ABSTRACT:

CHG DATE=20021203 STATUS=O> Method for storing MMS (Multimedia  
Messaging  
Service)-related information, related method for accessing MMS-related

information, related storage medium, related apparatus and related software programs The invention relates to method for storing MMS (Multimedia Messaging

Service)-related information, wherein said information is stored on at least one storage medium connected to a mobile communication apparatus which supports

MMS services or a device connected to such a mobile communication apparatus,

said at least one storage medium being disconnectable from said apparatus or said device. Furthermore, the invention concerns a related method for accessing MMS-related information by an apparatus adapted to process said MMS-related information, a related storage medium, a related apparatus and related software programs. <IMAGE>
